Etisalat CX Solutions Employee Portal

Briefing for Operations Managers · Prototype with demo data · October 2026

DEMO VERSION — FOR TESTING ONLY. This prototype is not connected to any live server, database, company system, or external service. All features, requests, and calculations are for demonstration only.

1. Purpose

This briefing introduces a working prototype of one app for every employee and manager at Etisalat CX Solutions. Each person opens it straight into their own position and finds what they need in one place. We would like your feedback before deciding whether to take it further.

- **Requests** (leave, HR letters, IT tickets, inquiries) are submitted and approved in one flow instead of separate tools.
- **Performance and pay** (live KPI, commission, salary estimate) are visible to the employee at any time.
- **Information** (news, events, tools) sits next to daily tasks rather than on a separate intranet.

2. Who sees what

The app has seven roles, plus an admin who assigns each person a position. Anyone without an assigned position sees a “No access” screen.

Role	What they see	Key actions
Employee	Attendance, leave balance, HR letters, live KPI, commission, pay, news	Check in and out, request leave or a letter, report an IT issue
Team Leader	Team status today, team KPIs	Approve leave requests
Operations Manager	Live operations, team pace, escalations	Approve overtime, long leave and headcount requests
Senior Manager	Business overview, forecast, portfolios	Approve budget, headcount and policy requests
Account Manager	Client accounts, SLA status, client requests	Accept or decline client requests
HR	People dashboard, letter requests, leave balances	Issue or decline HR letters
IT	Ticket queue, equipment list	Start and resolve tickets
Admin	People and positions	Assign positions; set the exchange rate

3. The employee experience

Five tabs, modelled on the layout of the Etisalat Egypt app, in Etisalat red and white. The app adapts to phone, tablet and desktop and has a light and a dark mode.

Tab	What it does
Home	Check in and out, leave left, KPI and commission for the month, latest news and quick tools
Services	Leave, HR letters, IT help, attendance, inquiries and other requests
Pay	Live KPIs, commission bucket, salary estimate and the pay scheme for the position
Hub	News, quick tools, upcoming events and newcomers
More	Profile, support, speak up, referral form and light or dark mode

4. Your view as an Operations Manager

- **Live operations:** collection today and month to date against target, contact rate, attendance and agents on call.
- **Team pace:** each team compared with where it should be by today's date. On track is 95% of plan or more, Watch is 85% to 95%, Behind is under 85%.
- **Escalations:** overtime, long leave and headcount requests from Team Leaders, approved or rejected in one tap.

5. How KPI and commission work

The scoring follows the scorecard and commission scheme currently used for collections agents.

KPI component	Weight	Target
Collection	45%	Score by bucket: 20K to 25K = 15 pts, 25.1K to 30K = 25, 30.1K to 35K = 35, 35.1K to 39.9K = 40, 40K = 45 (+1 per extra 1K)
Absenteeism	25%	5% or less
Quality	10%	95%
Positive connect	10%	17%
Conformance	10%	99.75%

Collection bucket (AED)	Commission (EGP)
20,000 and above	200
25,000 and above	1,000
30,000 and above	2,500
35,000 and above	4,000
40,001 and above	4,600
50,001 and above	5,500

The full bucket table is in the app and visible to every role. Lateness above 10 minutes in a month takes 5 points off the KPI and 5% off commission. Amounts are shown in AED and EGP at a single exchange rate (about 14.48 EGP per AED, mid-market, mid-October 2026) that only admins can change.

6. Pay scheme by position (demo figures)

Every position has a pay scheme showing fixed pay, variable pay, deductions and a worked example month. The figures below are placeholders; the structure (car allowance, COLA at 40% of basic, KPI variable, standard deductions) follows the current payslip layout.

Position	Grade	Basic per month (EGP)	Variable pay
Agent	G2	3,500 to 4,800	Commission buckets + KPI variable
Senior Agent	G3	4,800 to 6,200	Commission buckets + KPI variable
Team Leader	G4	7,000 to 9,500	Team achievement bonus
Operations Manager	G6	14,000 to 19,000	Portfolio bonus by pace
Account Manager	G6	13,000 to 18,000	Bonus by client SLA
Senior Manager	G7	24,000 to 32,000	Annual bonus
HR Specialist	G3	6,000 to 8,500	KPI variable only
IT Support Engineer	G4	7,500 to 10,500	KPI variable only

7. Access and safety

- People are routed to their own role automatically, based on the position an admin assigns them.
- The exchange rate can be changed only by people with edit rights; everyone else sees it read-only.
- Every page carries a demo notice. No real employee, pay or client data is stored in the prototype.

8. Status and next steps

Today: a working prototype with demo data, tested on phone and desktop. **To go live:**

1. Company sign-in and a real database.
2. Links to the attendance, KPI and payroll sources.
3. Approval from IT and information security.
4. A pilot with one or two teams before wider rollout.

Open points to confirm

- The Quality scoring scale and the Positive connect target.
- The deductions for low account volume and valid TDRA cases (listed in the app but not yet applied).
- Whether the lateness deduction should also reduce commission (applied in the prototype).

Questions for you

- Does this cover your daily needs as an Operations Manager?
- What is missing for operations?
- Which teams should pilot first?
